Mohammad Faiz Khan

Software Engineer at Emirates

Summary

Working as a Software Developer since 2015, I have developed innovative solutions to help provide added value to the customer and have received an innovation award for the same. I am responsible for full lifecycle development of the product, from initial requirement gathering to design, coding, testing, documentation, and implementation. Worked extensively as a scrum master and lead the team to deliver work on schedule using agile methodology. Passionate full stack developer worked on javascript, node.js, spring, JPA, EJB, Hibernate and core java for 3 years+.

Amdocs

Software Developer

January 2015 - July 2018 (3 years 7 months)

Pune Area, India

Worked as associate Java software developer for Ordering management system, an Amdocs product, for the leading telecom provider in Canada and US. Followed clean code practices and a zero defect policy. Worked with dynamic development change requests and supported testing and releases.

Worked on tools like HP QC, CQ for handling defects and testing and Toad for handling databases.

Worked as a Java software developer for CPQ product of Amdocs from the scratch. This product based on microservices architecture. so i have developed different microservice like Notify billing, Automatic order process and service order fulfilment by using Spring boot, jdk 1.8, Apache kafka, zuul api gateway, zookeeper and oracle 12.

Worked as a Java software developer for ANRS/ODO/SFO/USM/ASD products of Amdocs. these are the OSS telecom domain products. i have developed different user stories by using jdk1.8/jdk1.7, JS, React JS, Spring (MVC/IOC), Hibernate/JPA, Web service(REST/SOAP), EJB 3.0 and some amdocs specific framework(ASCF, GT, ASC, AIF).

Roles and Responsibilities:

- # Working on different User stories.

- # Creating the DD and Test Cases for CRS, upload in ALM, Rally and Doc center.

- # Screens for placing Orders majorly from GT or SOM Application.

- # Orchestrating the orders until the Activation.

- # Decomposing the CFS and RFS according to the type of Order

- # Involved in analysis, design, development and unit testing.

- # Analysis of client needs objectives and business and technology requirements.

- # Coding includes writing java classes, Stored Procedures and sql queries.

- # Created stored procedure and table according to requirement.

- # Understanding the requirements from Client/Onsite.

- # Developed technical design document.

- # Responsible for timely deliveries of work requests.

- # Worked as an independent member and responsible for each and every step of the project delivery.
